## WCCCU Congratulates its Newest Scholar:

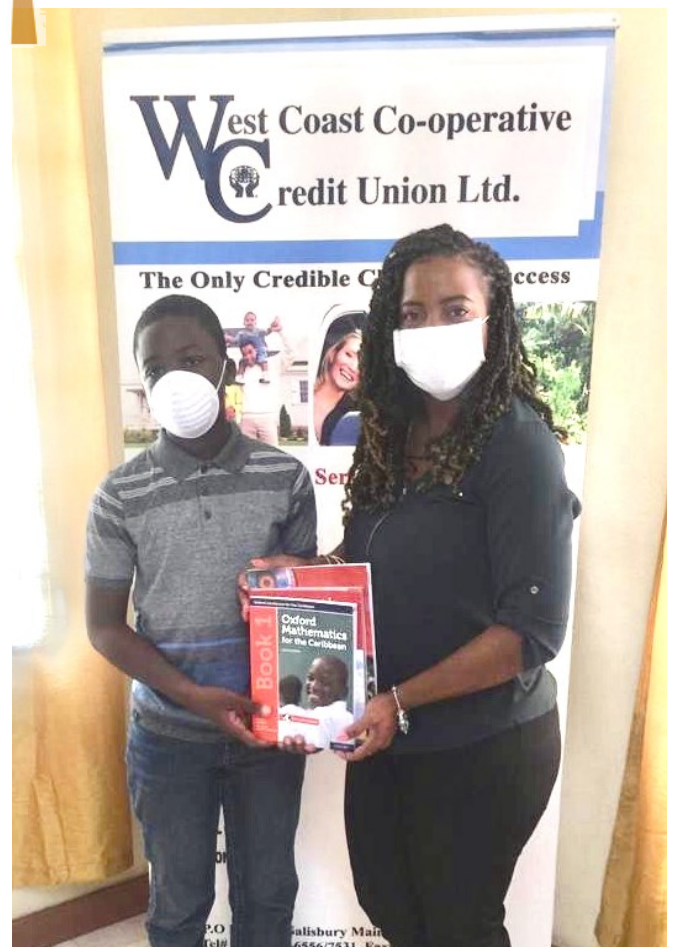

# *Congratulations!*

*Mr. Jye Henry*

The West Coast Co-operative Credit Union has proven its dedication to the communities it serves and to the educational development of the children and wards of its members. Each year, the society awards a student based on merit to attend secondary school.

This year, we are proud to award **Mr. Jye Henry** of **St. Joseph** a successful scholar at this year's GSAT Exams, a scholarship to attend secondary school for the next five years. This scholarship provides for textbooks, stationery, transportation and payment of examination fees for the scholars' school life provided he/she performs creditably.

The West Coast Co-operative Credit Union, congratulates our new scholar, Mr. Jye Henry and wishes him success in his academic endeavors in the school years to come.

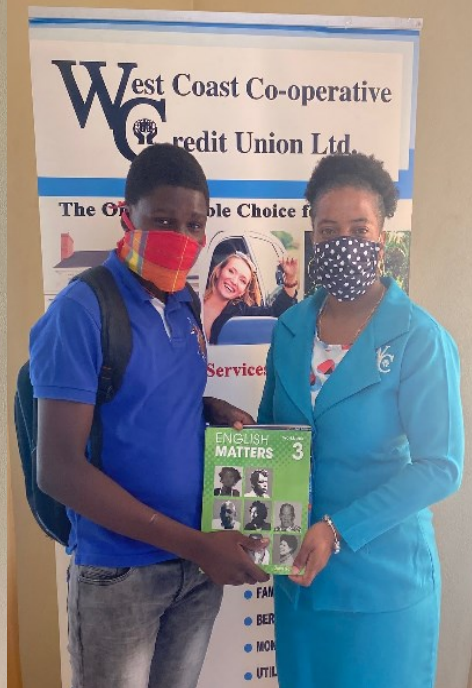

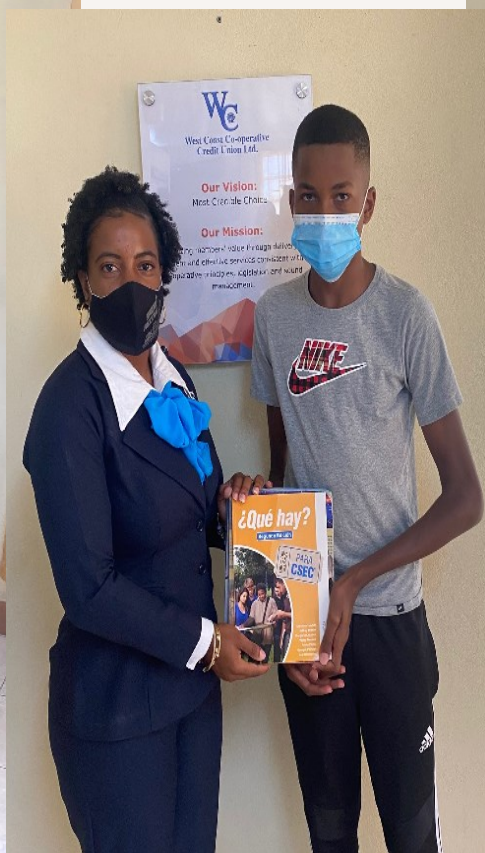

# Continuing WCCCU Scholars

The Continuing West Coast scholars, Gracelyn Victor, Bill Frederick, Raynolvens Merzier and Alexis Waldron who are now in their fifth, forth, third and second years at secondary school, have also received their text books, and stationery for the upcoming school year.

By continuously making education readily available to our youth, not only adds values to the communities that we serve,

but also contributes to the livelihood of our members. West Coast is indeed honored that it can have such a great impact.

We congratulate our scholars on such a successful school year and wish them success in this upcoming one.

# BACK TO SCHOOL

## WITH COVID-19

A lot of persons are voicing their concerns in reference to the Covid-19 pandemic and the opening of schools. Schools were carded to open for the new school year, here in Dominica on September 7th 2020.

A lot of schools on island have indicated the various protocols which will be followed in ensuring the health and safety of both staff and students. How-

ever, persons still seem a bit uneasy with the fact that there are active cases on island and health officials are still contact tracing.

Whilst both parents and teachers agreed that the online learning system posed a number of challenges and that they prefer the face to face classroom setting, Covid-19 is making this reality rather implausible.
